

IN THE SPECIFICATION:

Please amend the third paragraph, on page 4 of the application as follows:

Referring to Fig. 1, which discloses a pre-fill chamber 10 installed on a prior art incinerator 100. The incinerator 100 generally includes a cylindrical container 111, which may be a 55 gallon drum or any other suitable container for the combusting gases. The container 111 has an open upper end 112 onto which a lid 113 is mounted. The lid 113 includes a tangentially directed inlet opening 113B ~~(not shown)~~ immediately adjacent its top 115. The top 115 has a central exhaust area 116.
